

# VDPupdate.exe

C.L.Distefano rev. 2017-09-27

## Purpose

Update an existing [vDosPlus](#) installation to the latest Branch, Build, and Revision  
Optionally, restart vDosPlus

## Setup

Locate **VDPupdate.exe** in the directory with **vDosPlus.exe**.

## Basic Usage

Update vDosPlus: **VDPupdate**

Update and restart vDosPlus: **VDPupdate /R**  
**VDPupdate vDosPlus.exe\_args**  
E.g.: **VDPupdate /cfg myconfig.txt**

## File Handling:

- Existing **CONFIG.TXT** and **AUTOEXEC.TXT** files are maintained. The new config and autoexec files are saved as **CONFIG.NEW** and **AUTOEXEC.NEW**.
- Existing **CONFIG.TXT**, **AUTOEXEC.TXT**, and **vDosPlus.exe** files are additionally backed up with date-and-time-stamped filenames.
- The *entire existing vDosPlus installation* is zipped and backed up as **VDPUPD-backup.zip**.

## Alternate Usages
